-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4,8,12,16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted prior art (AAPA) in view of Lacks antecedent basis. Rocca (U.S. Patent 5618453).

AAPA as found on page 2, lines 4-18 of the specification, discloses : a method for securing a body mount support bracket to a portion of a vehicle body and frame assembly comprising the steps of: providing a body mount support bracket; securing the body mount support bracket to a portion of a vehicle body and frame assembly ; providing a body mount support bracket including a central body portion having a pair of leg portions depending therefrom; providing the central body portion with an aperture therethrough and providing leg portions that extend from the central body portion and diverge apart from one another.

AAPA fails to teach the step of creating internal stresses within the body mount support bracket and so as to maintain the internal stresses therein.

La Rocca teaches the step of creating internal stresses within the body mount support bracket; and so as to maintain the internal stresses therein (col.1, lines 38-49).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to employ the step of creating internal stresses within the body mount support bracket

Art Unit: 3726

and so as to maintain the internal stresses therein on the method of AAPA so as to secure a body mount support bracket to a portion of vehicle body.

*Allowable Subject Matter*

3. Claims 6,7,10,11,14,15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
